ESTONIA

Dear doctor!

I have pleasure in informing You in foundation which was recently established under the name of ASSOCIATION of UKRAINIAN DOCTORS mail adress 270001 Ukrainian Republic. Odessa, R. Luxemburg st.29, ph.office /UKR.REP.code/ +0482+247 132 or +0482+265 689.

The Association was formed to satisfy it's member need in up-to-date high quality medical information and professional support. We are very interested to lay the foundation for collaborative projects with medical associations in promoting the WHO European Health Strategies /HFA/. We suppose - our energetic Association will be expanding in the nearest years especially in collaboration with the regional medical associations and and WHO REGIONAL OFFICES in assistance of health care reforms in our independent country.

At the first step of collaboration, as we think are:

1. Professional medical information exchange and mambership in conferences.

2. Exchange of municipal medical care delegations or specialists.

3. Nonformal medical families contacts /People-to-People/

It would be most helpful to know in which fields you are particularly interested and whether you would like to receive regular information about our organisation.

We consider this activity as one of extreme importance, not only to provide professional medical transfer, but to further understanding and cooperation between our countries.

Assuring You that we shall appreciate a word in reply from You.

Thanking You beforehand for Your cooperation, I remain

Dr. J.N. Gordon.
